10]},  
        pre_dispatch='2*n_jobs', refit=True, return_train_score='warn',  
        scoring=None, verbose=0)>
```

We can plot the confusion matrix

```
[32]: yhat = svm_cv.predict(X_test)  
plot_confusion_matrix(Y_test, yhat)
```

1.14 TASK 10

Create a k nearest neighbors object then create a GridSearchCV object knn_cv with cv = 10. Fit the object to find the best parameters from the dictionary parameters.

```
[41]: parameters = {'n_neighbors': [1, 2, 3, 4, 5, 6, 7, 8, 9, 10],
                    'algorithm': ['auto', 'ball_tree', 'kd_tree', 'brute'],
                    'p': [1,2]}

KNN = KNeighborsClassifier()
```

```
[42]: knn_cv = GridSearchCV(KNN, parameters, cv=10)
knn_cv.fit(X, Y)
```

```

deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
Deprecated in NumPy 1.20; for more details and guidance:

packages/sklearn/neighbors/base.py:907: DeprecationWarning: `np.int` is a

```

deprecated alias for the builtin ``int``. To silence this warning, use ``int`` by itself. Doing this will not modify any behavior and is safe. When replacing ``np.int``, you may wish to use e.g. ``np.int64`` or ``np.int32`` to specify the precision. If you wish to review your current use, check the release note link for additional information.

Deprecated in NumPy 1.20; for more details and guidance:

<https://numpy.org/devdocs/release/1.20.0-notes.html#deprecations>

packages/sklearn/neighbors/base.py:907: DeprecationWarning: `np.int` is a
deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
Deprecated in NumPy 1.20; for more details and guidance:

packages/sklearn/neighbors/base.py:907: DeprecationWarning: `np.int` is a
deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
```

deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
Deprecated in NumPy 1.20; for more details and guidance:

deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
Deprecated in NumPy 1.20; for more details and guidance:

packages/sklearn/neighbors/base.py:907: DeprecationWarning: `np.int` is a
deprecated alias for the builtin `int`. To silence this warning, use `int` by
itself. Doing this will not modify any behavior and is safe. When replacing
`np.int`, you may wish to use e.g. `np.int64` or `np.int32` to specify the
precision. If you wish to review your current use, check the release note link
for additional information.
Deprecated in NumPy 1.20; for more details and guidance:
https://numpy.org/devdocs/release/1.20.0-notes.html#deprecations
    self._y = np.empty(y.shape, dtype=np.int)

5, 'p': 1}
accuracy : 0.8444444444444444
```

1.15 TASK 11

Calculate the accuracy of `tree_cv` on the test data using the method `score`:

```
[45]: knn_cv.score
```

```
[45]: <bound method BaseSearchCV.score of GridSearchCV(cv=10, error_score='raise-
deprecating',
        estimator=KNeighborsClassifier(algorithm='auto', leaf_size=30,
metric='minkowski',
        metric_params=None, n_jobs=None, n_neighbors=5, p=2,
        weights='uniform')),
        fit_params=None, iid='warn', n_jobs=None,
        param_grid={'n_neighbors': [1, 2, 3, 4, 5, 6, 7, 8, 9, 10], 'algorithm':
['auto', 'ball_tree', 'kd_tree', 'brute'], 'p': [1, 2]},
        pre_dispatch='2*n_jobs', refit=True, return_train_score='warn',
        scoring=None, verbose=0)>
```

We can plot the confusion matrix

```
[46]: yhat = knn_cv.predict(X_test)
plot_confusion_matrix(Y_test,yhat)
```

```
/home/jupyterlab/conda/envs/python/lib/python3.7/site-
packages/sklearn/neighbors/base.py:442: DeprecationWarning: distutils Version
classes are deprecated. Use packaging.version instead.
    old_joblib = LooseVersion(joblib_version) < LooseVersion('0.12')
/home/jupyterlab/conda/envs/python/lib/python3.7/site-
packages/sklearn/neighbors/base.py:442: DeprecationWarning: distutils Version
classes are deprecated. Use packaging.version instead.
    old_joblib = LooseVersion(joblib_version) < LooseVersion('0.12')
```

1.16 TASK 12

Find the method performs best:

```
[47]: # Compare the best_scores of these tests:
      # logistic regression: 0.8222222222222222
      # SVM: also 0.8222222222222222
      # Decision tree: 0.9
      # K-Nearest Neighbors: 0.8444444444444444
```

The test with the highest accuracy was the decision tree test!
